

SUMMARY

Software Developer with 7+ years of delivering expert customer service and sales. I'm passionate about technology and eager to create projects that positively impact the lives of others. Working in the food industry taught me to maintain a high standard for my work in a high-volume, fast-paced environment. While working in an AGILE group setting I'm able to leverage excellent communication skills, relationship management, diverse experience, and technical skills.

TECHNICAL SKILLS

LANGUAGES: Javascript, Python, Java, HTML, CSS

FRAMEWORKS: ReactJS, NextJS, Flask, Spring Boot, Bootstrap, TailwindCSS

DATABASES: MySQL, MongoDB

TOOLS: GitHub, Chrome DevTools, Visual Studio Code, AWS ECS

Skills

- Languages: Fluent speaker in English and Spanish
- Collaborated with and led a group of developers in AGILE team meetings
- Created full-stack projects using technologies such as; Python + flask with MySQL, HTML, CSS, and Javascript
- Full-stack projects created using React, Express, Node, and MongoDB

Technical Projects

Lexoletics e-Commerce Application | [GITHUB](#)

TECHSTACK: Python, Flask + Jinja, MySQL

Enterprise level full-stack application

- Built application end-to-end using Python, Flask framework + Jinja, and MySQL database. Using MySQL many-to-many relationships I was able to build a functional cart checkout system implementing Stripe API.
- Using the B-Crypt Python library, I was able to store encrypted users passwords to ensure the protection and privacy of website visitors.
- Tested site registration with backend authentication to prevent creating accounts with the same usernames and to prevent SQL injection.
- Elegantly written code to be easily readable and modularized for easy navigation.

Athlead Meetup Application (ReClub Clone) | [GITHUB](#)

TECHSTACK: Java, Spring Boot, Maven, MySQL

Full-Stack ReClub clone

- Designed and developed a meetup application so users can plan out, post, and attend different meets.
- Built using Java, Spring Boot framework, Maven, Apache TomCat, and Spring Boot Suite IDE.
- Designed and built functional login and registration capabilities alongside backend authentication to prevent users from creating accounts with the same username.
- Elegantly written code to be easily readable and modularized for easy navigation.

Portfolio Website | [SEE HERE](#)

TECHSTACK: ReactJS, GitHub Pages, HTML, CSS

Enterprise level full-stack application

- Developed a responsive, scalable, and beautiful website portfolio using ReactJS, HTML and CSS. Designed with smooth scrolling transitions and easy-to-use navigation bar component. Written using functional components and React Hooks.
- Installed gh-pages dev dependencies to deploy application on GitHub Pages.
- Well-written, modularized code which is easy to navigate and files are easy to find.
- Improved user-experience by integrating EmailJS API to give user an easy way to get in contact with me.

Work Experience

Gen Korean BBQ

Server — Fremont, CA

December 2018 – March 2021

- Experience working and communicating as a team.
- Learned how to balance multiple tasks in a short amount of time.
- Quickly thinking of ways to be more efficient around the store while also catering to diners' needs.
- Developed skills to do well under pressure and trained many new servers.

Ramen Nagi

March 2022 - June 2022

Server — Palo Alto, CA

- Continuing giving quality service to many customers every day and great experience in a team environment.

Education

Coding Dojo - Full Stack Web Development Coding Bootcamp

August 2022 - November 2022

Silicon Valley, CA

- 16 weeks intensive coding bootcamp: 1000+ hours of full stack web development, pair programming, testing, and algorithms.

Moreau Catholic High School

August 2013 – May 2017

Hayward, CA

- Led CMT (Campus Ministry Team) in school-wide events and community building
